## IMPORTANT

Dear Parents/Carers

We are currently reviewing all **diagnosed medical conditions/needs** in school and reviewing/updating Medical Care plans. This will help us to ensure our Register of Medical Needs is correct.

A diagnosed medical condition may be eczema, asthma, diabetes, hayfever, hypermobility, seizures, hearing/eyesight issue, specific physical conditions plus others.

If your child has a medical need we will need to know details such as signs/symptoms, strategies, medication, inhalers, physical limits and effects – this will help us form a medical plan. From this we can update/review medical care plans which we will then share with you.

We are also reviewing and updating our register of **diagnosed Allergies and Intolerances** so please update the relevant information and medication needed.

All updates can be made via the [Arbor Parent Portal](#). If you have any issues accessing the portal, please contact the school office. Please ensure all information is updated **by Sunday 22<sup>nd</sup> February at the latest**.

Many thanks

Mrs Statham  
Headteacher
